

# Hearts and Arrows Band

## Original Design, Winter 2024

(c) 2024 Kim Brody Salazar, <http://string-or-nothing.com>

This being the run-up to Valentine's Day, I offer this hearts and arrows interlace band. It would make lovely cuffs and collars, or an interesting strip on a band sampler. One thing to note – a departure for me. See those arrow points? They are created from two HALF STITCHES. Also, note that the arrows themselves, both fletching and points are asymmetrical to the surrounding hearts. I did that on purpose, to avoid even more dreaded half stitches.

As ever, I offer this as good-deed-ware. If you use this, please pay it forward by assisting someone else, or making the day a bit brighter for a friend, family member, acquaintance, or stranger. And also as usual, if you want to use any of these patterns for commercial purposes, either for combination into a new published design work, or to produce for sale or donation (especially in quantity) please contact me before doing so. But please feel free to use it as you wish for your own private enjoyment.
